DETAILED ACTION

This is the third office action for U.S. Application 10/618,489 for a Soft Pad Picture Mount filed by Edward Giles on July 11, 2003. Claims 11-13 are pending.

Claim Rejections - 35 USC § 102

Claims 11-13 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 2,643,840 to Lanman. Lanman discloses a support product with a conforming pad (formed by 28 and 29) with a first side and a second side. There is a releasable adhesive (38) fixed to the first side of the conforming pad and the adhesive bonds the first side of the pad to a medium which can allow the pad assumes the shape of the medium where the adhesive contacts the medium. There is a post (18) with a pointed end distal the second side of the conforming pad, which is fixed to the pad and extends outwardly from the second side of the pad. The first side could change shape from a planar configuration to a curved configuration as the medium changed shape, due to the fact that the adhesive holds the first side to the medium.

Response to Arguments

Applicant's arguments filed August 8, 2005 have been fully considered but they are not persuasive. Applicant claims the adhesive "causing the first side to change", which Lanman would accomplish due to the fact that the adhesive holds the entire first side to the picture. As the picture changed shape so would the first side.
